## **Pennsylvania Inventor to Exhibit “Flex-E-Stir” at America’s Largest Invention Show**

PITTSBURGH... InventHelp’s INPEX®, America’s Largest Invention Trade Show, announces that inventor, Chad Dillaman, from Meadville, Pennsylvania, has invented a flexible and reusable device to mix paint. This invention will be exhibited at INPEX® 2010, June 16-18, in Pittsburgh.

The Flex-E-Stir is a flexible, soft-edged instrument that will easily reach into corners of paint cans and cups to effectively mix paint. Comprised of plastic, the Flex-E-Stir can be used to stir all types of paint. The Flex-E-Stir is easy to clean, re-usable, and environmentally responsible.

The inventor was approached with this idea because of his profession. “This product was an idea that my father and brother-in-law came to me with. They recently converted to water-based paint in the family’s auto body business. With this conversion, wooden stir sticks cannot be utilized” said Dillaman. “I have designed and developed this product from their idea and experiences. The Flex-E-Stir will be marketed to all paint-related disciplines”

Dillaman is exhibiting at INPEX® with the hopes of finding a distributors and retailers.

INPEX®, The Invention Show, is a unique trade show that showcases new products and innovations that are available to business and industry to manufacture, license or distribute. As part of the trade show, The Invention Show sponsors INPEX® Inventors University™, a series of seminars, presentations, and panel discussions to provide information that inventors may find useful in pursuing their ideas. This year, INPEX® will be held at the newly constructed Monroeville Convention Center in Monroeville, just minutes from downtown Pittsburgh.

INPEX® is a service of InventHelp®, America’s largest inventor service company. For more information about this inventor or INPEX®, call 888-54-INPEX or visit [www.inpex.com](http://www.inpex.com).
