Connecticut Inventor to Exhibit “Gutter Grinder™” at America’s Largest Invention Show

PITTSBURGH... InventHelp’s INPEX®, America’s Largest Invention Trade Show, announces that inventor, Michael Migliaccio, from Greenwich, Connecticut, has invented a device that reduces the clogging of gutters. This invention will be exhibited at INPEX® 2010, June 16-18, in Pittsburgh.

When debris, leaves and sludge collect in gutters over time and after rainfall, it can be a horribly strenuous job to clean. One inventor took this into consideration and thought of an idea called, “Gutter Grinder™”, which is a solution to assist individuals with gutter maintenance.

The Gutter Grinder™ device contains a motor-driven grinder which grinds up water-borne debris that passes through the housing. The device includes a water sensor and a debris sensor for operating the motor only when both water and debris are present. Additionally, Gutter Grinder™ prevents clogged downspouts.

The inventor was inspired to think of his invention because of his gutter problems. “I always had problems with clogged down spouts,” said Migliaccio

Migliaccio is exhibiting at INPEX® with the hopes of finding a manufacturer and a venture capitalist.

INPEX®, The Invention Show, is a unique trade show that showcases new products and innovations that are available to business and industry to manufacture, license or distribute. As part of the trade show, The Invention Show sponsors INPEX® Inventors University™, a series of seminars, presentations, and panel discussions to provide information that inventors may find useful in pursuing their ideas. This year, INPEX® will be held at the newly constructed Monroeville Convention Center in Monroeville, just minutes from downtown Pittsburgh.

INPEX® is a service of InventHelp®, America’s largest inventor service company. For more information about this inventor or INPEX®, call 888-54-INPEX or visit www.inpex.com.
