## **Illinois Inventor to Exhibit “Super Clear & Hygienic Vacuum Cleaner with Unique Transparent Filterable Liner” at America’s Largest Invention Show**

PITTSBURGH... InventHelp’s INPEX®, America’s Largest Invention Trade Show, announces that Jack Zhang, from Frankfort, Illinois, has invented a truly clean and healthy vacuum cleaner system that helps to eliminate second-hand pollution. This invention will be exhibited at INPEX® 2012, June 13-15, in Pittsburgh, Pennsylvania.

Maintaining a clean carpet can be one of the toughest household chores if the proper equipment is not on hand. Allergens and dirt get locked into the carpet fibers and cause a whole host of pollutants in the air the whole family breathes. One inventor took this into consideration and thought of an idea called “Super Clear & Hygienic Vacuum Cleaner with Unique Transparent Filterable Liner”, which is a no-mess clean up solution for the next generation of vacuum cleaners.

The “Super Clear & Hygienic Vacuum Cleaner with Unique Transparent Filterable Liner” performs all the advantages of a bagged vacuum cleaner and the awareness of the bagless vacuum cleaner, however, the unique feature of this next generation vacuum cleaner is the disposable transparent vacuum cleaner filter bag which has a transparent outer wall and an inner filter. A user will be able to see the level of dirt collected in the bag and replace it on time without dust exposure. This feature is ideal for those suffering from allergies or asthma. Additionally, the concept of a transparent filter bag can be applied to any type of vacuum – upright, canister, portable or cordless. More information may be found at [www.transparentvacuumcleanerbag.com](http://www.transparentvacuumcleanerbag.com).

The inventor was inspired to think of his invention because of the dirtiness involved with standard vacuum cleaners. “I was tired of cleaning up the filter and bin after one hour of vacuuming,” said Zhang. “I want to relieve everyone from touching and breathing dust when they clean the vacuum filter and dust bin.”

Zhang is exhibiting at INPEX® with the hopes of finding a manufacturer, distributor venture capitalist and licensee.

INPEX®, The Invention Show, is a unique trade show that showcases new products and innovations that are available to business and industry to manufacture, license or distribute. As part of the trade show, The Invention Show sponsors INPEX® Inventors University™, a series of seminars, presentations, and panel discussions to provide information that inventors may find useful in pursuing their ideas. This year, INPEX® is proud to announce Kevin Harrington, of ABC’s Hit Show, Shark Tank, as the 2012 keynote speaker.

INPEX® is a service of InventHelp®, America’s largest invention submission company. For more information about this inventor or INPEX®, call 888-54-INPEX or visit [www.inpex.com](http://www.inpex.com).
