INPEX to Establish Permanent Theater Room directed by teamLab at Kashiwazaki Hydrogen Park in Kashiwazaki, Niigata Prefecture, Japan

TOKYO, JAPAN - [INPEX CORPORATION](#) (INPEX) announced it will open a Theater Room directed by international art collective teamLab at its Kashiwazaki Hydrogen Park (hereinafter “facility”) in Kashiwazaki City, Niigata Prefecture, Japan, in spring 2026. The facility consists of a blue hydrogen and ammonia demonstration plant, the Kashiwazaki Hydrogen Power Plant and the Hirai Gas Collection Station. INPEX constructed the facility to support its blue hydrogen and ammonia production and utilization demonstration test project.

The Theater Room will be located in the visitor building of the facility and feature content presenting an overview of the facility and explaining the philosophy of the project, which is Japan's first to integrate the entire process from the production to the utilization of hydrogen and ammonia, non-polluting energy sources that do not emit CO₂ during usage.

The Company announced [INPEX Vision 2035](#) on February 13, 2025, which is centered on realizing a responsible energy transition. As part of this vision, INPEX has set a goal to advance lower-carbon solutions based on CCS and hydrogen by 2035 as one of its growth pillars. The project represents a key initiative toward achieving this goal.

By opening the Theater Room, INPEX aims to enhance public awareness and understanding of the project and its initiatives to help realize a carbon-neutral society.

About TeamLab:

teamLab (f. 2001) is an international art collective. Their collaborative practice seeks to navigate the confluence of art, science, technology, and the natural world. Through art, the interdisciplinary group of specialists, including artists, programmers, engineers, CG animators, mathematicians, and architects, aims to explore the relationship between the self and the world, and new forms of perception.

About INPEX

INPEX is Japan's largest exploration and production (E&P) company, engaged in the development and operation of oil and gas projects worldwide. We are committed to contributing to a brighter future by delivering energy in a sustainable way. As part of this commitment, we are also engaging in lower-carbon solutions such as CCS, hydrogen and integrated power supply, while pursuing new opportunities in the evolving energy landscape.
