Mitsuuroko Green Energy Co., Ltd.  
INPEX CORPORATION

**Mitsuuroko Green Energy and INPEX JAPAN to Sign MOU on  
Electricity Business Collaboration**

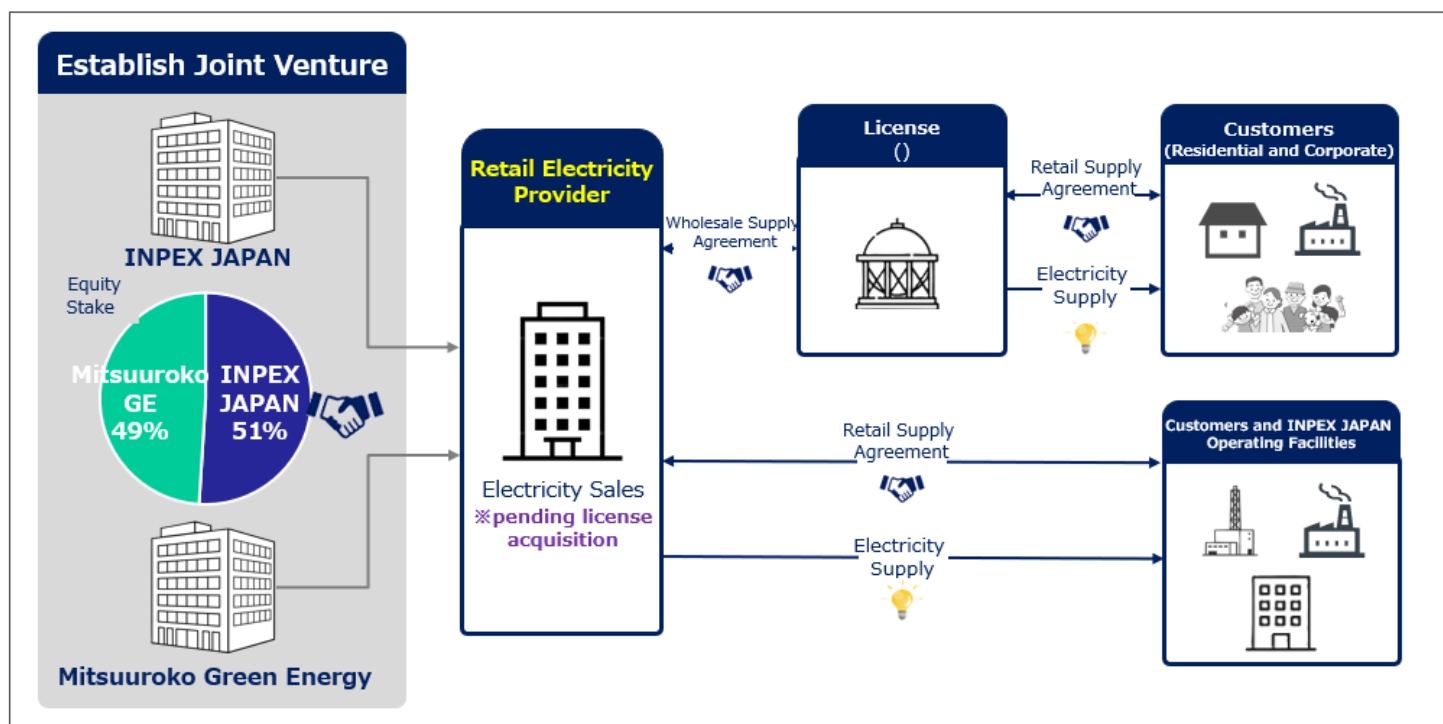

TOKYO, Japan – Mitsuuroko Green Energy Co., Ltd. (Mitsuuroko Green Energy) and INPEX JAPAN Co., Ltd. (INPEX JAPAN), a wholly owned subsidiary of [INPEX CORPORATION](#) (INPEX), announced they have reached an agreement to sign a Memorandum of Understanding (MOU) on business collaboration in the electricity sector.

Under the terms of the MOU, the two companies will establish a new joint venture company, which will promote electricity marketing proposals directed mainly at INPEX JAPAN's domestic natural gas customers. Subsequently, the entity will also undertake electricity procurement, supply-demand management and market trading. Looking ahead, Mitsuuroko Green Energy and INPEX JAPAN will also plan to collaboratively develop various power sources, including solar power plants and battery storage systems, to meet customer and market demand.

Mitsuuroko Green Energy, embodying the Mitsuuroko Group's corporate philosophy of being a “provider of prosperous living,” is committed to fostering collaboration with stakeholders to achieve a sustainable society and carbon neutrality by FY2050. Through its business development, Mitsuuroko Green Energy will continue to enhance its engagement with local communities, diversify and expand its services and create added value, all built on the foundation of a stable energy supply.

INPEX JAPAN aims to develop its business in electricity-related fields as a comprehensive energy developer. This aligns with one of the growth pillars for achieving a responsible energy transition as outlined in INPEX Vision 2035, which was announced by INPEX in February 2025. Through business development stemming from this MOU, INPEX JAPAN will actively contribute to the transformation of the energy structure in Japan, fulfilling its responsibility for domestic energy development and stable energy supply.
