Public-Private Collaboration at Yunishigawa Dam!

Promoting carbon neutrality and regional revitalization through hydropower projects

The Kanto Regional Development Bureau of the Ministry of Land, Infrastructure, Transport and Tourism and Yunishigawa Mirai Hydropower GK have signed a basic agreement to advance the commercialization of hydropower projects. Through discussions and collaboration with the local community, the agreement aims to promote carbon neutrality and regional revitalization by leveraging hydropower energy.

On October 27, 2025, the Ministry of Land, Infrastructure, Transport and Tourism Kanto Regional Development Bureau signed a basic agreement with Yunishigawa Mirai Hydropower GK—a joint venture established through investments by selected project candidates—regarding the "Yunishigawa Dam New Hydropower Plant Installation and Operation Project."

■Overview of the Yunishigawa Dam New Hydropower Plant Installation and Operation Project
This project aims to promote carbon neutrality through renewable energy effectively utilizing the unused hydropower resources contained within Yunishigawa Dam. It also seeks to support regional revitalization in the area of the dam. By leveraging private sector capital, management expertise and technical capabilities, the project will efficiently install and operate a hydropower plant at the dam.

■Upcoming Schedule

- April 2026: Detailed design of power generation facilities and various procedures in compliance with relevant laws
- April 2028: Start of construction
- April 2030: Commencement of hydropower plant operations

About the Yunishigawa Dam New Hydropower Plant Project

Location	Nishikawa area, Nikko City, Tochigi Prefecture
Planned generating capacity	2,300 kW
Scheduled construction startup	April 2028
Scheduled start of operations	April 2030

About Yunishigawa Mirai Hydropower GK

Company Name	Yunishigawa Mirai Hydropower GK
Location	Nishikawa area, Nikko City, Tochigi Prefecture
Established	March 12, 2026
Business Activities	Installation and operation of the Yunishigawa Dam New Hydropower Plant
Investing Companies	TEPCO Renewable Power, Inc., NTT Anode Energy Corporation, CTI Engineering Co., Ltd., INPEX CORPORATION, KAJIMA CORPORATION, TOBISHIMA CORPORATION
