Gunma Prefecture Forest and Green Conservation General Incorporated Foundation
AERO TOYOTA CORPORATION
INPEX CORPORATION

**Registration Completed for Forest-based J-Credit Generation Project in
Public Forests Managed by Gunma Prefecture Forest and
Green Conservation General Incorporated Foundation**

TOKYO, JAPAN – The Gunma Prefecture Forest and Green Conservation General Incorporated Foundation (Foundation), AERO TOYOTA Corporation (formerly registered as Asahi Koyo Co., Ltd.) (AERO TOYOTA), and [INPEX CORPORATION](#) (INPEX) announced the official registration of the “Forest-based J-Credit Generation Project” to be implemented in public forests managed by the Foundation.

Launched under a non-binding collaborative agreement entered in July 2025 on the generation of J-Credits derived from forests operated by the Foundation※1, the project seeks to quantify CO₂ absorption through adequate forest management and conservation activities and generate J-Credits.

Beginning in fiscal 2026, The parties will implement the project in phases to generate J-Credits, promote ongoing forest maintenance, support the forestry sector and regional revitalization in Gunma Prefecture and contribute to the realization of a low-carbon society by leveraging the J-Credits.

Project Registration Details

- Target forests: Approximately 503 hectares of public forest managed by the Foundation
- Project duration: 8 years
- Forest classification: Growing forest
- Estimated CO₂ absorption: Approximately 21,000 t-CO₂ (projected)
